TSXV: SVRS | OTCQB: SVRSF | FSE: SVR

Forward Looking Statements & Cautionary Notes

All statements, trend analysis and other information contained in this presentation about anticipated future events or results constitute forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “seek”, “anticipate”, “believe”, “plan”, “estimate”, “expect” and “intend” and statements that an event or result “may”, “will”, “should”, “could” or “might” occur or be achieved and other similar expressions. All statements, other than statements of historical fact, included herein, including, without limitation, statements regarding anticipated benefits of the acquisition of the La Parrilla Silver Mine and Mill and future exploration plans and results, are forward-looking statements. Although Silver Storm Mining Ltd. (“Silver Storm” or the “Company” – formerly Golden Tag Resources Ltd.) and Qualified Persons (in the case of technical and scientific information) believes that the expectations reflected in such forward-looking statements and/or information are reasonable, undue reliance should not be placed on forward-looking statements since the Company can give no assurance that such expectations will prove to be correct. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements, including the risks, uncertainties and other factors identified in the Company’s periodic filings with Canadian securities regulators, and assumptions made with regard to: that the Company’s future exploration programs will grow the Mineral Resource base or upgrade Mineral Resource confidence, the risk that the assumptions referred to above prove not to be valid or reliable, the Company’s plans and expectations for La Parrilla, the ability of the Company to incorporate La Parrilla into the business of the Company, and the ability to eventually place the asset back into production.

Forward-looking statements are subject to business and economic risks and uncertainties and other factors that could cause actual results of operations to differ materially from those contained in the forward-looking statements. Important factors that could cause actual results to differ materially from the Companies’ and Qualified Persons (in the case of technical and scientific information) expectations include: the risk that the Company will be unable to incorporate La Parrilla into the business of the Company, the risk that the Company is unable to achieve its goal of placing La Parrilla back into production, there being no assurance that the Company’s future exploration programs will grow the Mineral Resource base or upgrade Mineral Resource confidence, the risk that the assumptions referred to above prove not to be valid or reliable, market conditions and volatility and global economic conditions including increased volatility and potentially negative capital raising conditions resulting from the continued or escalation of the COVID-19 pandemic, risk of delay and/or cessation in planned work or changes in the Company’s financial condition and development plans; risks associated with the interpretation of data (including in respect of third party mineralized material) regarding the geology, grade and continuity of mineral deposits, the uncertainty of the geology, grade and continuity of mineral deposits and the risk of unexpected variations in mineral resources, grade and/or recovery rates; risks related to gold, silver and other commodity price fluctuations; employee relations; relationships with and claims by local communities and indigenous populations; availability and increasing costs associated with mining inputs and labour, the speculative nature of mineral exploration and development, including the risks of obtaining necessary licenses and permits and the presence of laws and regulations that may impose restrictions on mining, including the Mexican mining reforms; risks relating to environmental regulation and liability; the possibility that results will not be consistent with the Company’s expectations; and other risk factors as detailed from time to time and additional risks identified in Silver Storm’s filings with Canadian securities regulators on SEDAR+ in Canada (available at www.sedarplus.ca).

Such forward-looking information represents management’s and Qualified Persons (in the case of technical and scientific information) best judgment based on information currently available. No forward-looking statement can be guaranteed, and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.

Cautionary Note:

This Presentation does not constitute an offer to sell or the solicitation of an offer to buy securities in any jurisdiction where such offer or sale is prohibited. This Presentation may not, except in compliance with any applicable exemption under applicable securities law, be taken or transmitted into any jurisdiction or distributed to any person resident in any jurisdiction. The distribution of this Presentation in or to persons in a jurisdiction may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction. In Canada, this Presentation is for delivery only to “accredited investors” as defined in National Instrument 45-106 –Prospectus and Registration Exemptions (“NI 45-106”). In the case of other jurisdictions, this Presentation is for delivery only to those persons who are qualified in that jurisdiction to purchase the securities described herein. Any other person who receives this Presentation should not rely or act upon it. By accepting this Presentation and not immediately returning it, the recipient represents and warrants that they are a person who falls within one or more of the above descriptions of persons entitled to receive the Presentation. This Presentation is not to be disclosed to any other person or used for any other purpose.

Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.

Qualified Persons Statement:

The technical information contained in this corporate presentation is based on assumptions, qualifications and procedures, which are not fully described therein. Reference should be made to the full text of technical reports, which were filed under each company’s profile on SEDAR+ at www.sedarplus.ca and on the Company’s website at www.silverstorm.ca.

Certain technical data in this presentation pertaining to La Parrilla was taken from NI 43-101 technical reports as described herein, and is subject to the assumptions, qualifications and procedures described herein. David Machuca, PEng., and Daniel Sepulveda, SME-RM, all Qualified Persons as defined by NI 43-101 and in the employment of SRK Consulting (Canada) Inc., have reviewed the technical information contained in the report referenced below. For additional information, please refer to the technical report titled “Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico”, prepared by SRK Consulting (Canada) Inc., with an effective date of August 10, 2023, prepared for Golden Tag Resources Ltd (Silver Storm Mining Ltd.).

Certain technical data in this presentation pertaining to San Diego was taken from NI 43-101 technical reports as described herein, and is subject to the assumptions, qualifications and procedures described therein. Claude Duplessis, Eng., Kateri Marchand, M.Sc. P.Geo, Guy Desharnais, PhD, P. Geo, and Gilbert Rousseau, Eng., all Qualified Persons as defined by NI 43-101 and in the employment of SGS Canada Inc., have reviewed the technical information contained in the report referenced below. For additional information, please refer to the technical report titled “NI 43-101 Technical Report, Updated Mineral Resource Estimate San Diego Project, Velardena Mining District Durango State, Mexico” with an effective date of April 12th, 2013, prepared for Golden Tag Resources Ltd. (Silver Storm Mining Ltd.) and Golden Minerals Co.

In accordance with NI 43-101 Standards of Disclosure for Mineral Projects, Bruce Robbins, PGeo, is the Qualified Person for the Company and has validated and approved the technical and scientific content of this presentation.

Cautionary Note to U.S. Investors

National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI 43-101") is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosures an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all reserve and resource estimates contained or incorporated by reference in this presentation have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining Metallurgy and Petroleum Classification System. These standards differ significantly from the requirements of the SEC, and reserve and resource information contained herein and incorporated by reference into this presentation may not be comparable to similar information disclosed by U.S. companies. In this presentation, we use the terms "measured", "indicated" and "inferred" resources. U.S. investors are cautioned that, while such terms are recognized and required by Canadian securities laws, the SEC does not recognize them. Under U.S. standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. U.S. investors are cautioned not to assume that all or any part of measured or indicated resources will ever be converted into reserves. U.S. investors should also understand that "inferred resources" have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. It cannot be assumed that all or any part of the "inferred resources" will ever be upgraded to a higher category. Therefore, U.S. investors are also cautioned not to assume that all or any part of the inferred resources exist, or that they can be mined legally or economically. Disclosure of "contained ounces" is permitted disclosure under Canadian regulations; however, the SEC only permits issuers to report "resources" as in place tonnage and grade without reference to unit measures. Accordingly, information concerning descriptions of mineralization and resources contained in this presentation, including the documents incorporated by reference therein, may not be comparable to information made public by U.S. companies subject to the reporting and disclosure requirements of the SEC.

This document does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States or any other jurisdiction. Any such offer to sell or solicitation of an offer to buy the securities described herein or during the presentation will be made only pursuant to subscription documentation between the Company and prospective purchasers. Any such offering will be made in the United States in reliance upon an exemption from registration under the U.S. Securities Act of 1933, as amended (the "Securities Act"), for an offer and sale of securities that does not involve a public offering, and the offer and sale of the securities will be conditioned on the receipt of representations, warranties and agreements of prospective purchasers to establish that exemption.

In the United States, this Presentation is for delivery only to "accredited investors" as defined in Regulation D promulgated under the Securities Act. The information contained in this Presentation has not been reviewed or approved by the U.S. Securities and Exchange Commission or any state securities regulatory authority. Any representation to the contrary is unlawful. This Presentation does not include a complete description of the companies described herein or any offering. Any offer of securities of the Company will be made in the United States only pursuant to a subscription agreement and the provisions of applicable law. Copies of the subscription agreement and related subscription documents will be provided to prospective investors by the Company. Any securities to be offered for sale by the Company are not expected to be registered in the United States under the Securities Act or under any state securities laws and it is anticipated that any such securities offered or sold in the United States will be exempt from registration pursuant to Section 4(a)(2) and Regulation D promulgated under the Securities Act. As a result, such securities cannot be resold unless subsequently registered under applicable securities law or unless an exemption from such registration is available. Further, each person to which any securities of the Company are offered in the United States will be required to represent, among other things that such person is an "accredited investor" as that term is defined in Regulation D promulgated under the Securities Act.

THE SECURITIES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION NOR HAS THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION OR ANY STATE SECURITIES COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THIS COMMUNICATION. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

Silver Storm Mining Ltd.

Unearthing Hidden Opportunity

Near-Term Restart Opportunity

18-24-month target to restart mining at the past-producing La Parrilla Silver Mine Complex

Produced over 34 Moz AgEq between 2006 and 2019¹

Excellent In-Place Infrastructure

~US\$150M of in-place infrastructure including a 2,000 tpd mill and partial mining fleet

Fully permitted for production

Modest restart capital requirements

Significant Re-Rate Potential

Drill program underway at La Parrilla to grow mineral resource base near developed areas

Q4 2024 technical studies and mine plan to support future restart of mining and processing activities

Significantly undervalued compared to peers

Further Upside Optionality

San Diego is one of the largest undeveloped silver projects in Mexico

Investigating potential milling synergies with La Parrilla

Regional exploration work at La Parrilla

1. Per historic operating data provided to Silver Storm, as published in the Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico, prepared by SRK Consulting, dated August 10, 2023.

Capital Structure

Strong Balance Sheet and Supportive Shareholder Base

Capital Structure (as of Nov 2, 2023)

TSX-V Share Price (C\$)	\$0.10
OTC QB Share Price (US\$)	\$0.007
Shares Outstanding	397.14 M
Options ²	11.15 M
Warrants ³	24.98 M
Fully Diluted Shares Outstanding	433.27 M
Basic Market Capitalization (C\$M)	\$40 M
Cash on Hand (C\$M)	~\$7.25 M
Debt (C\$M)	\$0.0 M

Silver Storm Shareholders

- Eric Sprott holds 10.5%
- Two other unnamed institutions in aggregate hold almost 10%

1. Options are exercisable at \$0.08-\$0.33 up to Oct 15, 2025 including 9,900,000 exercisable at \$0.33 by Aug. 31, 2025
2. Warrants are exercisable at \$0.20 - \$0.40 up to Aug. 14, 2026 including 17,696,305 exercisable at \$0.34 by Aug. 14, 2026

Management & Board of Directors

Experienced Leadership Team in Exploration, Development & Financing

Executive Team

Greg McKenzie

President, CEO & Director

A former senior investment banker with over 20 years of experience. He has held positions with Morgan Stanley, CIBC World Markets and Haywood Securities and executed transactions in excess of \$18 billion. Mr. McKenzie previously practiced corporate law with a leading Canadian securities and M&A law firm.

Kalenci Flores

General Manager, Mexico

A mining engineer who has over 20 years of experience in both technical service and management roles in the mining industry, specializing in underground mining operations. He has held roles with First Majestic, Endeavour Silver, Mandalay, Nyrstar, and Coeur.

Carmelo Marrelli

Chief Financial Officer

The Principal of the Marrelli Group, a Chartered Professional Accountant (CPA, CA, CGA) and a member of the Institute of Chartered Secretaries and Administrators. Mr. Marrelli also acts as the CFO to a number of issuers on the TSX, TSX-V and CSE, as well as non-listed companies, and as a director of select issuers.

Will Ansley

COO, VP Corp. Dev. & IR

Over 20 years of mining industry experience including development & construction of seven mines in the Americas. He has held senior roles at FNX Mining, Lake Shore Gold, and acted as COO Mineral Streams Inc. in its sale to AuRico Metals Inc. in 2015.

Bruce Robbins

Geologist

Holds an M.Sc.A from McGill University and has over 30 years' experience as a geologist. He has managed the budgets of multi-million dollar exploration programs and has also served as an executive and board member of several public companies, including Silver Storm Mining (formerly Golden Tag Resources).

Board of Directors

Dwayne Melrose

Director

Over 30 years of international mining experience in Central Asia, China, Africa, and North and South America. He is the former President and CEO of True Gold Mining, Gold Reach Resources, and VP of Exploration of Minco Silver. He was instrumental in the discovery of the high-grade SB Zone at the Kumtor Gold Mine (+7 Moz gold reserves).

Tom English

Director & Chairman of the Audit Committee

Holds over 20 years experience in the financial industry at investment banks including CIBC World Markets and Salaman Partners covering both small and large cap companies.

Talal Chehab

Director

An Ontario lawyer who operates a law firm in Toronto specializing in corporate-commercial law. He holds a B.A. in economics from the University of Toronto in 1984 and obtained his Bachelor of Laws degree (LL.B) from Osgoode Law School, York University in 1987.

Why Silver?

Low-Carbon Transition Fuels Increased Silver Demand

- **Silver is a key metal** in electronics and components which **feed the green-technology transition**
 - Industrial demand led by solar photovoltaic panels and the electrification of the auto industry
- **Industrial fabrication silver usage** led by photovoltaics is **expected to reach an all-time high in 2023¹**
 - Photovoltaic's consumed 140.3 Moz silver in 2022 – an increase of over 100 Moz in a decade
- **Demand for silver continues to outpace supply**
 - Record market deficit of 237.7 Moz silver in 2022 with a further 142.1 Moz anticipated in 2023

Global Demand for Silver^{1,2}

Global Industrial Demand¹

Silver Market Balance¹

Solar Panels

1. Source: Metals Focus via The Silver Institute
2. Kitco.com (Silver Price – London Fix Annual Average)

Assets Based in Durango State

Strong In-Place Infrastructure with Attractive Exploration Upside

Durango A Top Mexican Mining State

Strong Mining Culture

- Mining dates back to 1552
- Safe and supportive of mining with 23 mines currently in Production
- Strong in-country and local support
- Daily connecting flights through Dallas, Texas and Mexico City
- From Durango City - 45min to La Parrilla and 1.5hrs to San Diego

La Parrilla Silver Mining Complex

Near-Term Production Restart Opportunity

- Underground Ag-Pb-Zn-Au mine complex
- ~US\$150M of in-place infrastructure
- 2,000tpd mill (1,000tpd oxide + 1,000 tpd sulphide)
- Fully permitted for production
- 7,000m drill program underway
- Large, underexplored land package

San Diego Project

Advanced Exploration

- One of Mexico's largest, undeveloped silver projects
- Resource open for expansion
- Exploring milling synergy potential with La Parrilla

SILVER STORM
— MINING —

La Parrilla Silver Mining Complex

La Parrilla – Processing Facility

Watch Video

La Parrilla Silver Mining Complex (Ag-Au-Pb-Zn)

Surface and Underground Infrastructure in Place to Support Near Term Restart

District Scale Property

- Large, underexplored 69,500 ha land package

Developed Infrastructure ~US\$150M in Place Replacement Value

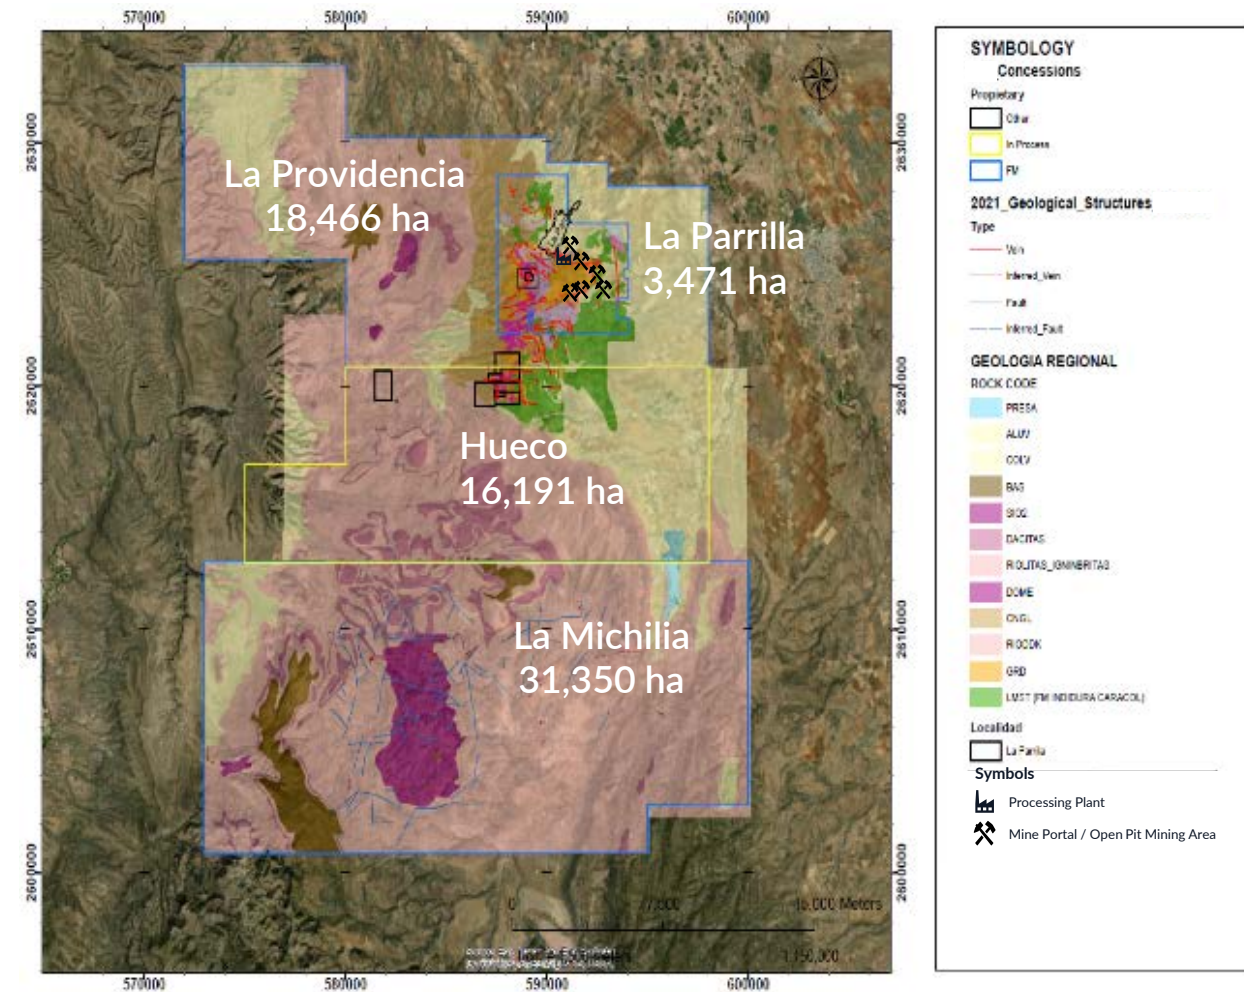

- Five underground mines, three key areas: Rosarios, San Marcos, and Quebradillas
 - Mines are primarily sulphide
- 2,000 tpd processing facility
 - 1,000tpd flotation and 1,000 tpd leaching circuits
- Fully-permitted for production

History of Production Dating to 1956

- Average of 3.52 Moz silver equivalent (~67% Ag + 33% Pb/Zn) produced between 2012-2018

Near-Term, Low Risk Restart Opportunity

- 7,000m drill program in progress
- 10,000m follow up drill program to come
- Q4 2024 technical studies and mine plan to support future restart of mining and processing activities

La Parrilla Mineral Resource Estimate

Initial Resource for Silver Storm – SRK Consulting, dated August 2023¹

La Parrilla – Mineral Resource Statement¹ (140 g/t AgEq oxide and 125 g/t sulphide cut-off)

Category, Mineral Type, and Mine		Quantity (kt)	Grade					Contained Metal				
			Silver (g/t)	Gold (g/t)	Lead (%)	Zinc (%)	AgEq (g/t)	Silver (k oz)	Gold (k oz)	Lead (kt)	Zinc (kt)	AgEq (k oz)
Indicated Mineral Resources												
Oxides	Rosarios	17	303	0.05	-	-	308	168	0.0	-	-	171
	San Marcos	76	223	0.18	-	-	240	545	0.4	-	-	585
	Quebradillas	-	-	-	-	-	-	-	-	-	-	-
	Subtotal – Indicated Oxides	93	238	0.16	-	-	253	713	0.5	-	-	756
Sulphides	Rosarios	273	153	0.08	1.56	1.27	236	1,342	0.7	4.3	3.5	2,071

	Quebradillas	217	165	0.05	2.27	2.17	289	1,151	0.3	4.9	4.7	2,016
	Subtotal – Indicated Sulphides	522	165	0.07	1.83	1.63	264	2,770	1.2	9.6	8.5	4,437
Total Indicated Resources		615	176	0.08	1.55	1.39	263	3,483	1.7	9.6	8.5	5,193
Inferred Mineral Resources												
Oxides	Rosarios	226	210	0.10	-	-	219	1,525	0.7	-	-	1,590
	San Marcos	211	289	0.10	-	-	298	1,965	0.7	-	-	2,027
	Quebradillas	8	146	0.18	-	-	162	35	0.0	-	-	39
	Subtotal – Inferred Oxides	445	246	0.10	-	-	256	3,525	1.5	-	-	3,657
Sulphides	Rosarios	302	139	0.22	1.40	1.27	229	1,347	2.2	4.2	3.8	2,223
	San Marcos	42	152	0.19	0.83	0.79	211	206	0.3	0.3	0.3	287
	Quebradillas	468	176	0.07	1.67	1.81	276	2,654	1.1	7.8	8.5	4,162
	Subtotal – Inferred Sulphides	812	161	0.113	1.53	1.56	255	4,207	3.5	12.4	12.7	6,672
Total Inferred Resources		1,257	191	0.12	0.99	1.01	256	7,731	5.0	12.4	12.7	10,328

- The mineral resource estimate was modelled using **22 zones across 3 underground mining areas**
- Indicated resource of 615 kt totaling 5.19 Moz AgEq
 - 85% of indicated AgEq ounces are sulphides
- Inferred resource of 1,257 kt totaling 10.33 Moz AgEq
 - 65% of inferred AgEq ounces are sulphides
- **Additional 3.8Moz AgEq in pillars that are excluded from the resource.** First Majestic routinely mines this material at their other operations
- Excellent in and near-mine exploration upside to grow resource

1. As published in the 'Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico', prepared by SRK Consulting, dated August 10, 2023. Please see slide titled: 'La Parrilla Mineral Resource Estimate Notes' for additional details.

La Parrilla 2023 Exploration Plan

Low-Risk Resource Drilling to Facilitate Restart Plan

- 7,000m in-fill and step-out drill program underway
 - Primarily testing the extensions of known structures
 - Program designed to increase the Inferred Resource base
- Drilling in proximity to underground mining infrastructure and existing development
- Three key target areas:
 - Quebradillas Underground – 3,000m
 - Rosarios and Cuerpo 340 – 3,000m
 - San Marcos – 1,000m

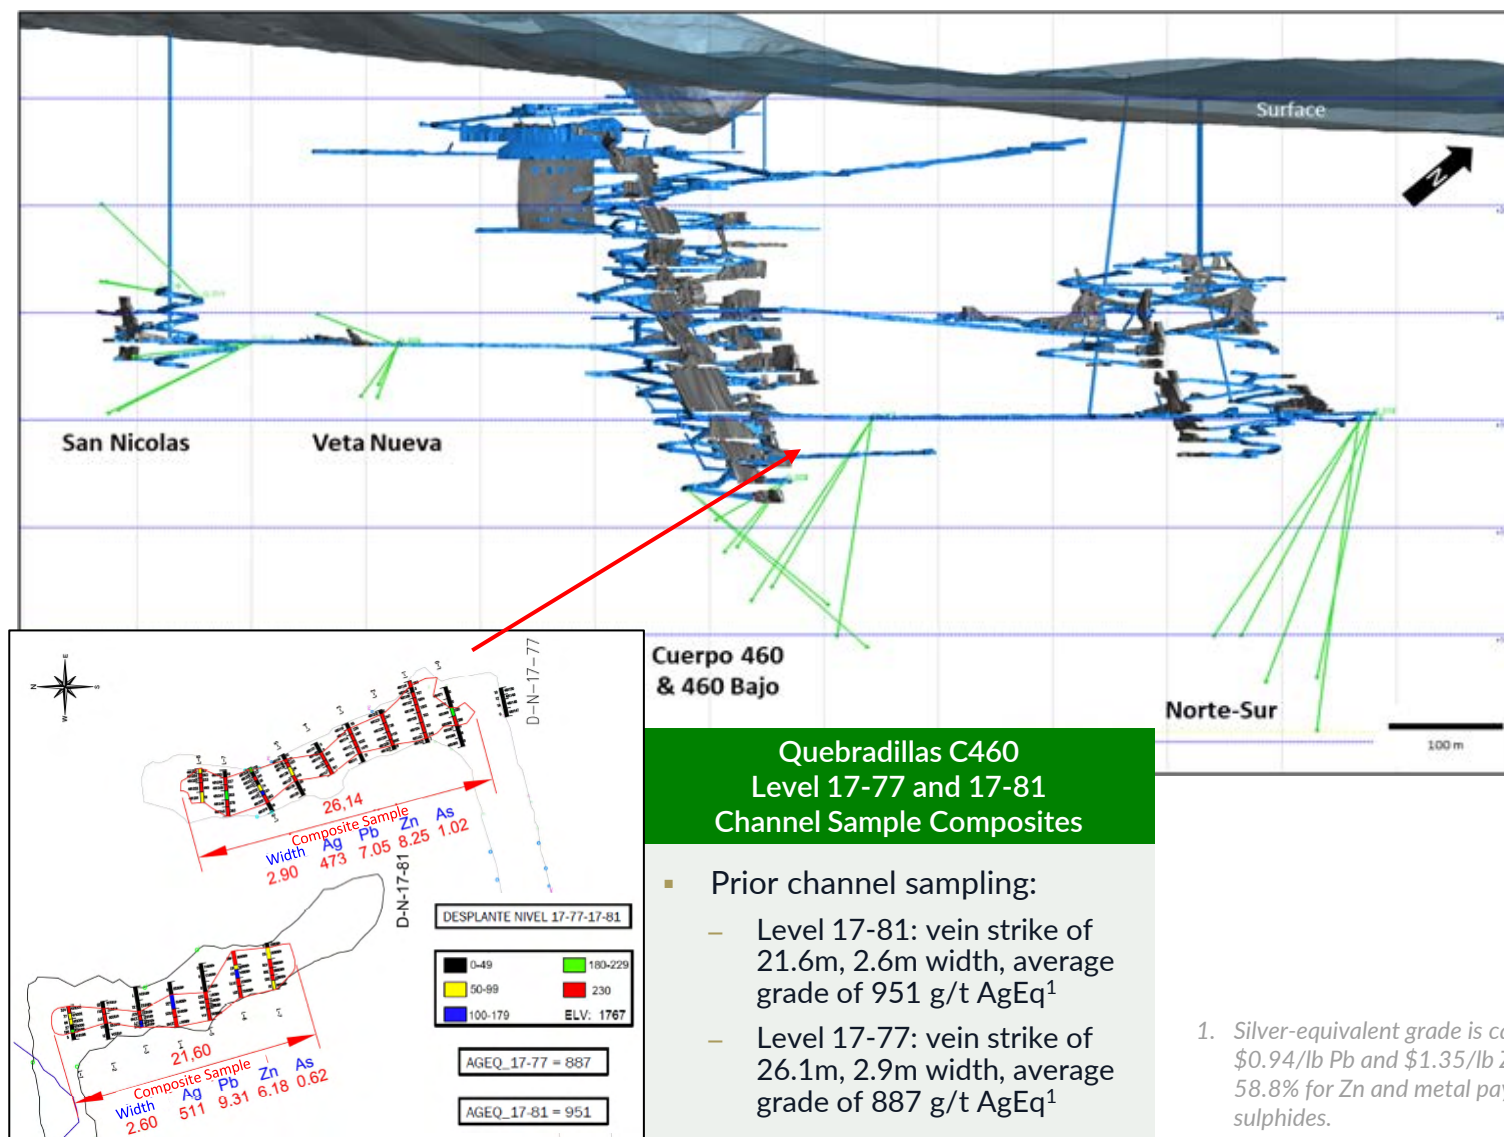

La Parrilla 2023 Resource Model

La Parrilla 2023 Exploration Plan

Quebradillas Underground

Quebradillas Underground – Planned Drillholes (Phase 1 – Fall 2023)

- 3,000 m of drilling to test the strike and down-dip extensions of three key zones
 - Cuerpo 460, Norte-Sur, and San Nicolas
- Cuerpo 460 a priority area with known mineralization
 - Existing drillholes in lower part of the zone were excluded from the resource due to changes in the vein envelope
- Norte-Sur targeting known extensions
 - Last level developed had a vein strike of 32m, width of 2.6m and an average grade of 397 g/t AgEq¹
 - Similar mineralization has been traced down ~150m

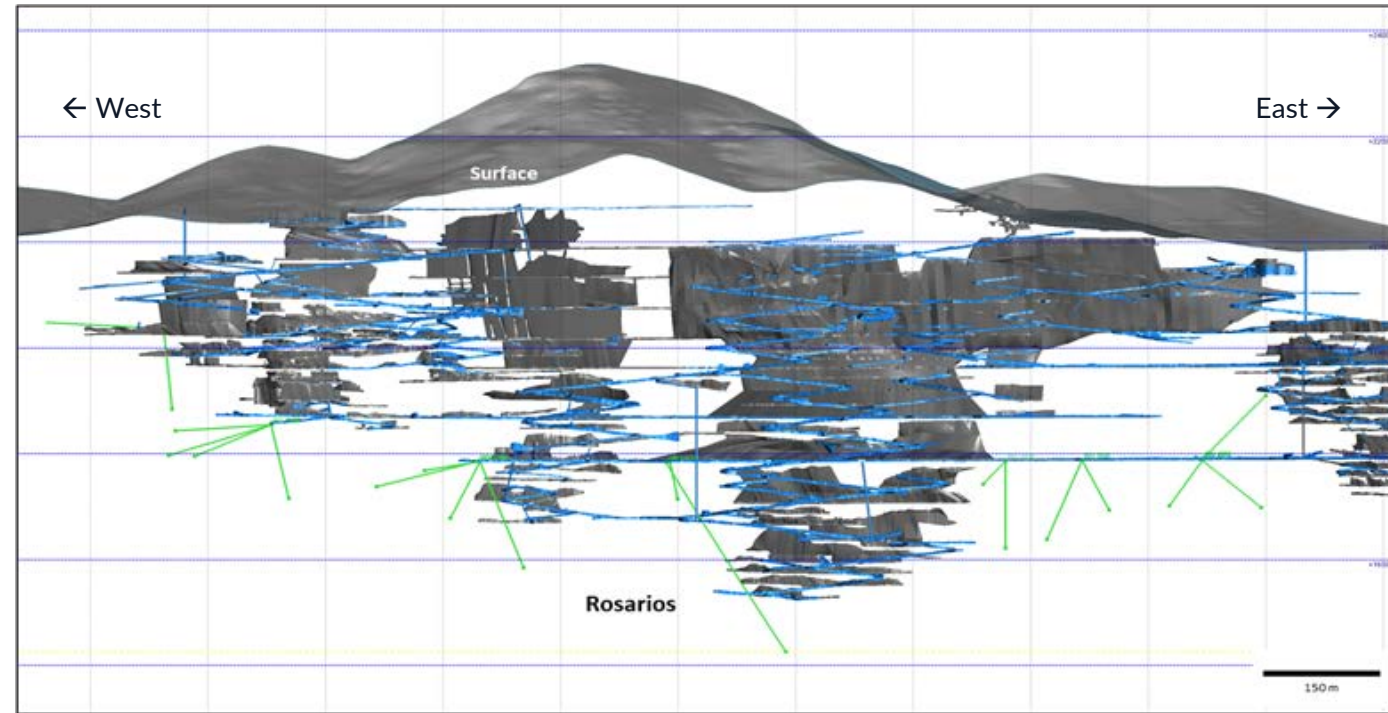

1. Silver-equivalent grade is calculated considering metal price assumptions of \$22.50/oz Ag, \$1,800/oz Au, \$0.94/lb Pb and \$1.35/lb Zn, metallurgical recoveries of 79.6% for Ag, 80.1% for Au, 74.7% for Pb and 58.8% for Zn and metal payable of 95% for Ag, Au, and Pb and 85% for Zn in concentrates produced from sulphides.

La Parrilla 2023 Exploration Plan

Rosarios and Cuerpo 340 Veins

- 3,000 m of drilling to test the east, west and central down-dip extensions
 - There are no drill holes at depth
- The Rosarios vein has a known strike length of 2,000m
 - Mineralization extends vertically for 900m
 - Thickness varies from 0.2 to 14m
- Cuerpo 340 resource has a strike length of 340m
 - Extends vertically for 260m
 - Hosts an average grade of 226 g/t AgEq¹
- Opportunity to expand mineral resources in proximity to existing developed mining areas

Rosarios – Planned Drillholes (Phase 1 – Fall 2023)

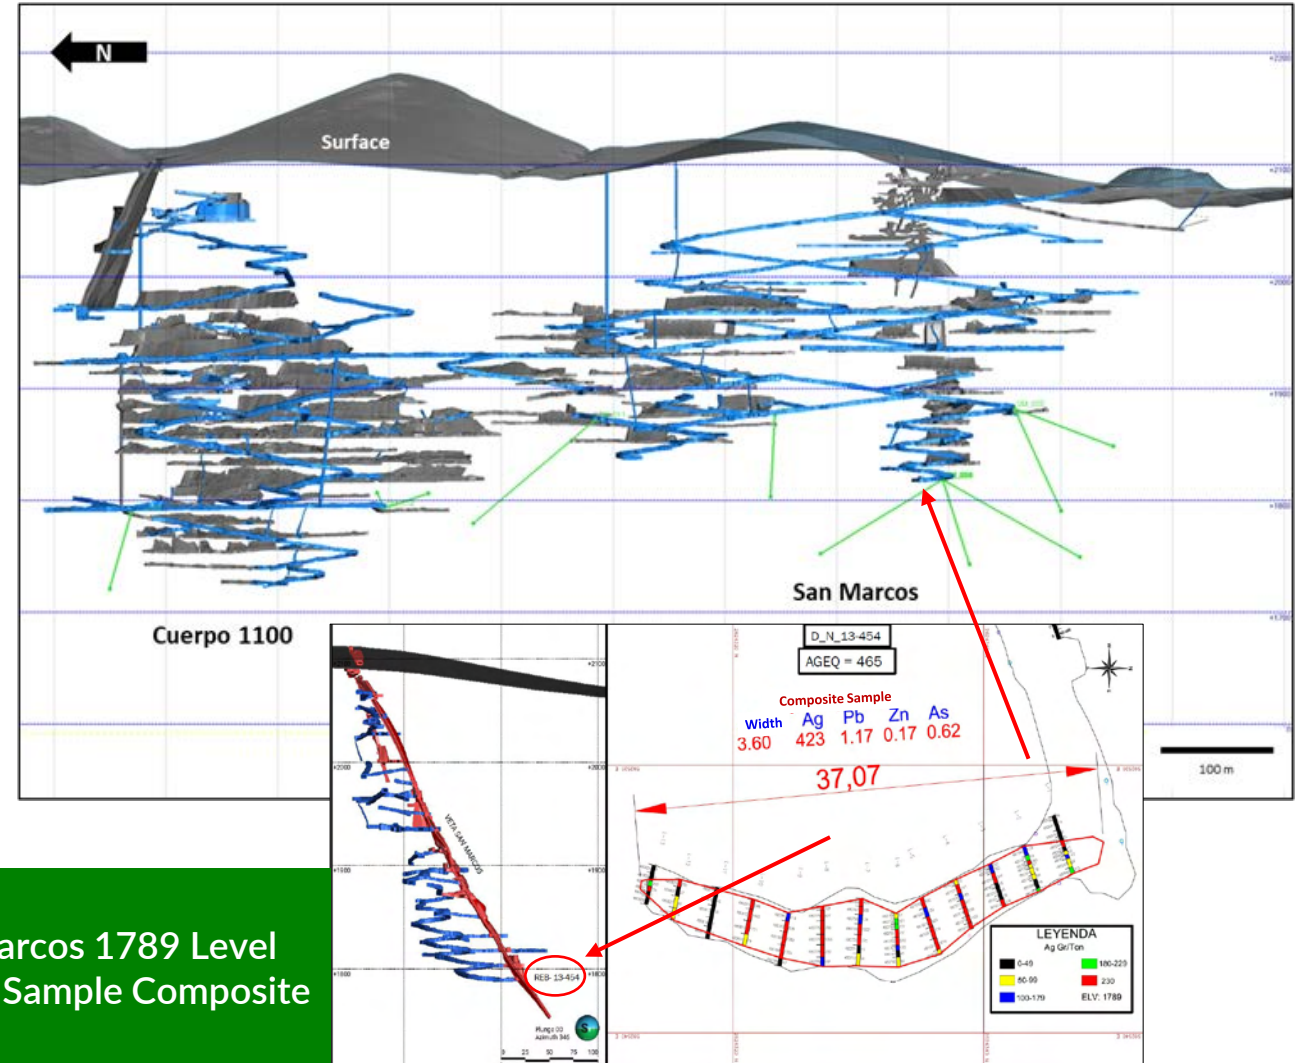

1. Silver-equivalent grade is calculated considering metal price assumptions of \$22.50/oz Ag, \$1,800/oz Au, \$0.94/lb Pb and \$1.35/lb Zn, metallurgical recoveries of 79.6% for Ag, 80.1% for Au, 74.7% for Pb and 58.8% for Zn and metal payable of 95% for Ag, Au, and Pb and 85% for Zn in concentrates produced from sulphides.

La Parrilla 2023 Exploration Plan

San Marcos and Cuerpo 1100

- 1,000 m of drilling to test the extension of San Marcos and Cuerpo 1100 at depth
- The San Marcos vein has a known strike length of 650m
 - Mineralization extends vertically for 350m
 - Thickness varies from 0.5 to 17m
- The last level developed at San Marcos (Level 1789) had a vein strike of 37m, width of 3.6m and an average grade of 465 g/t AgEq
 - Drilling and channel sampling suggest mineralization continues beyond current resource modelling

San Marcos – Planned Drillholes (Phase 1 – Fall 2023)

San Marcos 1789 Level Channel Sample Composite

1. Silver-equivalent grade is calculated considering metal price assumptions of \$22.50/oz Ag, \$1,800/oz Au, \$0.94/lb Pb and \$1.35/lb Zn, metallurgical recoveries of 79.6% for Ag, 80.1% for Au, 74.7% for Pb and 58.8% for Zn and metal payable of 95% for Ag, Au, and Pb and 85% for Zn in concentrates produced from sulphides.

18-24-Month Target to Restart Production at La Parrilla

Achieved

- ✓ **100% acquisition of La Parrilla Silver Mining Complex** and related mining and processing infrastructure
- ✓ **Initial resource estimate** based on prior drilling and production sampling
- ✓ **C\$7 million financing** to support resource drilling and technical studies for restart

In Progress

- **7,000m resource drill program** to grow mineral resource base near developed areas
- Mine and plant restart planning ongoing

To Come

- **10,000m Phase 2 drill program** following up on the success of Phase 1
- **Technical studies and mine plan** in Q4 2024 to support future restart of mining and processing activities
- Trade-off studies on using infrastructure at La Parrilla to process high-grade mineralization from San Diego

SILVER STORM
— MINING —

San Diego Project

San Diego Project (Ag-Au-Pb-Zn)

Location + Size + Potential for Synergies with La Parrilla

The Right Location

- 91.65 ha land package in the heart of the prolific Velardeña Mining District
 - 4 mining concessions 100% owned by Silver Storm
- 75km southwest from Torreón, 160km northeast of Durango

Sizeable Silver and Zinc Resource

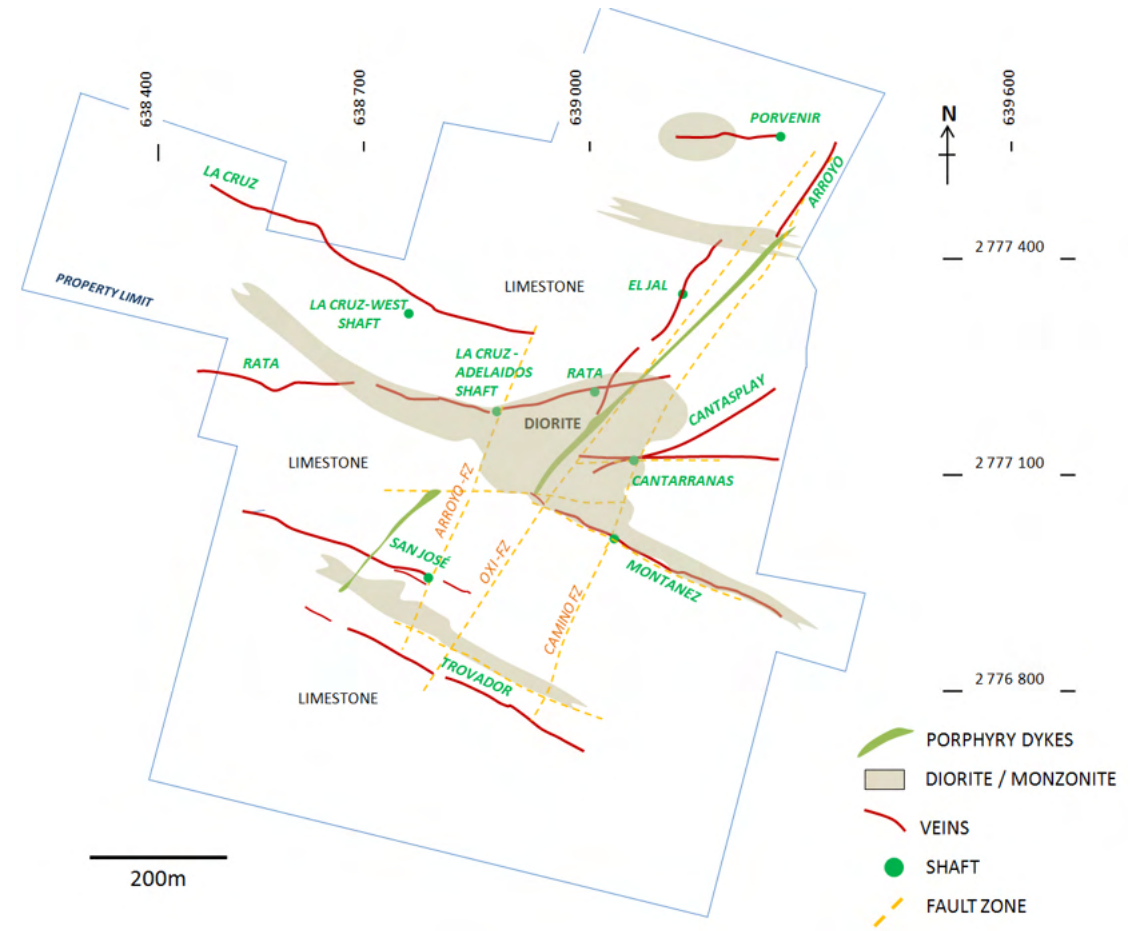

- Mineralization consists of a series of high-grade Ag-Pb-Zn veins which widen at depth and large endoskarn deposits
- Resource estimate based on 33,000m of drilling across 23 zones / veins

Large Development Opportunities

- Potential to expand resource in multiple areas:
 - Current resources open laterally and at depth
 - Recent drilling of the **57 Target confirms open pit potential**
- Higher-grade structures (>150 g/t Ag.Eq) could potentially be processed at La Parrilla¹

San Diego – Geological and Property Map

Main Veins and Structures at Surface

1. Additional metallurgical testing required to establish potential on the oxide and sulphide veins.

San Diego Mineral Resource Estimate

A Sizable Silver and Zinc Resource with Expansion Potential

San Diego – Mineral Resource Estimate – SGS Canada, April 2013¹

Category, Mineral Type and Zone	CoG (g/t)	Tonnes (Mt)	Grade					Contained	
			Gold (g/t)	Silver (g/t)	Lead (%)	Zinc (%)	AgEq² (g/t)	Ag (M Oz)	AgEq² (M Oz)
Indicated Resources

Total Inferred Resources		42.1						83.8	155.3

- The mineral resource estimate was modelled across **23 zones / veins**
 - Indicated resources¹ of 16.5 Mt containing 31.6M oz Ag and 438M lbs Zn (55.5M oz Ag.Eq²)
 - Inferred resources¹ of 42.1 Mt containing 83.8M oz Ag and 1,211M lbs Zn (155.3 M oz Ag.Eq²)
- Based on 33,000m of drilling
- Grades conservatively include recoveries and smelter deductions
- Excellent in and near-mine exploration upside to grow resource

According to SGS Canada, resources could potentially be expanded by **20-50 million tonnes grading from 100 to 150 g/t AgEq** from existing structures, as well as lateral and depth extensions³

1. As published in the 'NI 43-101 Technical Report: Updated Mineral Resource Estimate San Diego Project', prepared by SGS Canada, dated April 12, 2013. Please see slide titled: 'San Diego Mineral Resource Estimate Notes' for additional details.

2. Please see slide titled: 'San Diego Mineral Resource Estimate Notes' for additional details on the calculation of Ag.Eq.

3. This stated range of potential quantity and grade is conceptual in nature and there has been insufficient exploration to define a mineral resource.

San Diego Resource Size Comparison

One of the Largest Undeveloped Silver Projects in Mexico

Ranking of the Largest Undeveloped Mexican Primary Silver Projects¹

1. Reserves and Resources based on reported NI 43-101 statements and attributable ownership, with AgEq calculated using pricing of: \$22.50/oz Ag, \$1,800/oz Au, \$3.50/lb Cu, \$0.94/lb Pb, and \$1.35/lb Zn and incorporating reported metallurgical recovery rates and payable factors. M&I inclusive of mineral reserves where applicable.

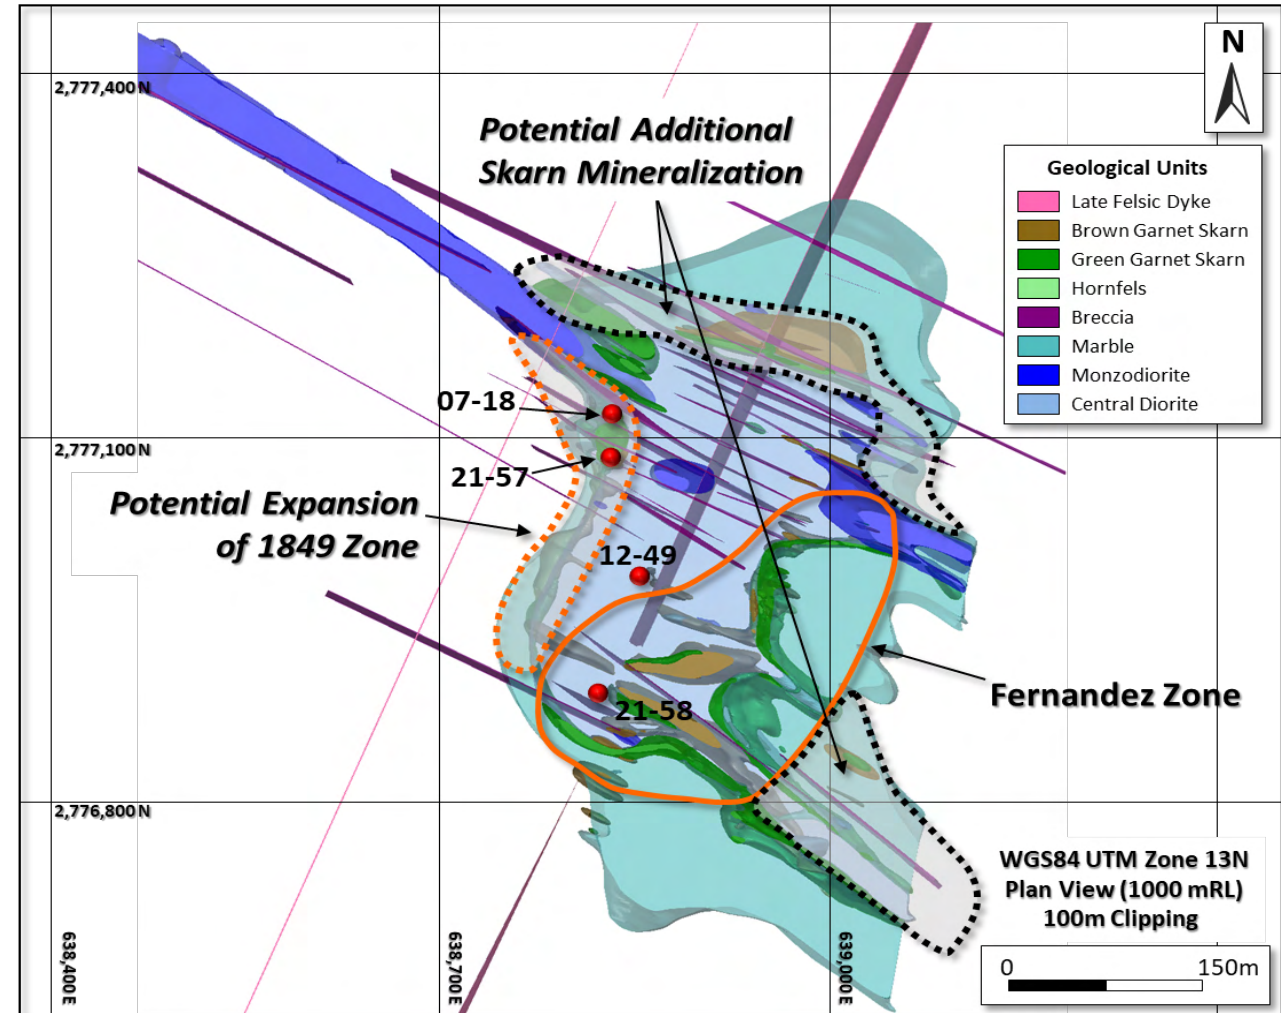

2. Potential based on SGS Canada commentary that resources could potentially be expanded by 20-50 million tonnes grading from 100 to 150 g/t AgEq; Chart considers 35 Mt grading 125 g/t AgEq. Note: This stated range of potential quantity and grade is conceptual in nature and there has been insufficient exploration to define a mineral resource.

San Diego Geologic Model

4 Key Exploration Zones

1. 1849 Zone
 - Broad zone of skarn mineralization with bulk tonnage potential
2. Fernandez Zone
 - Broad intercepts of endoskarn mineralization with bulk tonnage potential
3. Montanez Zone
 - Potential additional skarn mineralization
4. 57 Target
 - Open pit potential above the Fernandez Zone

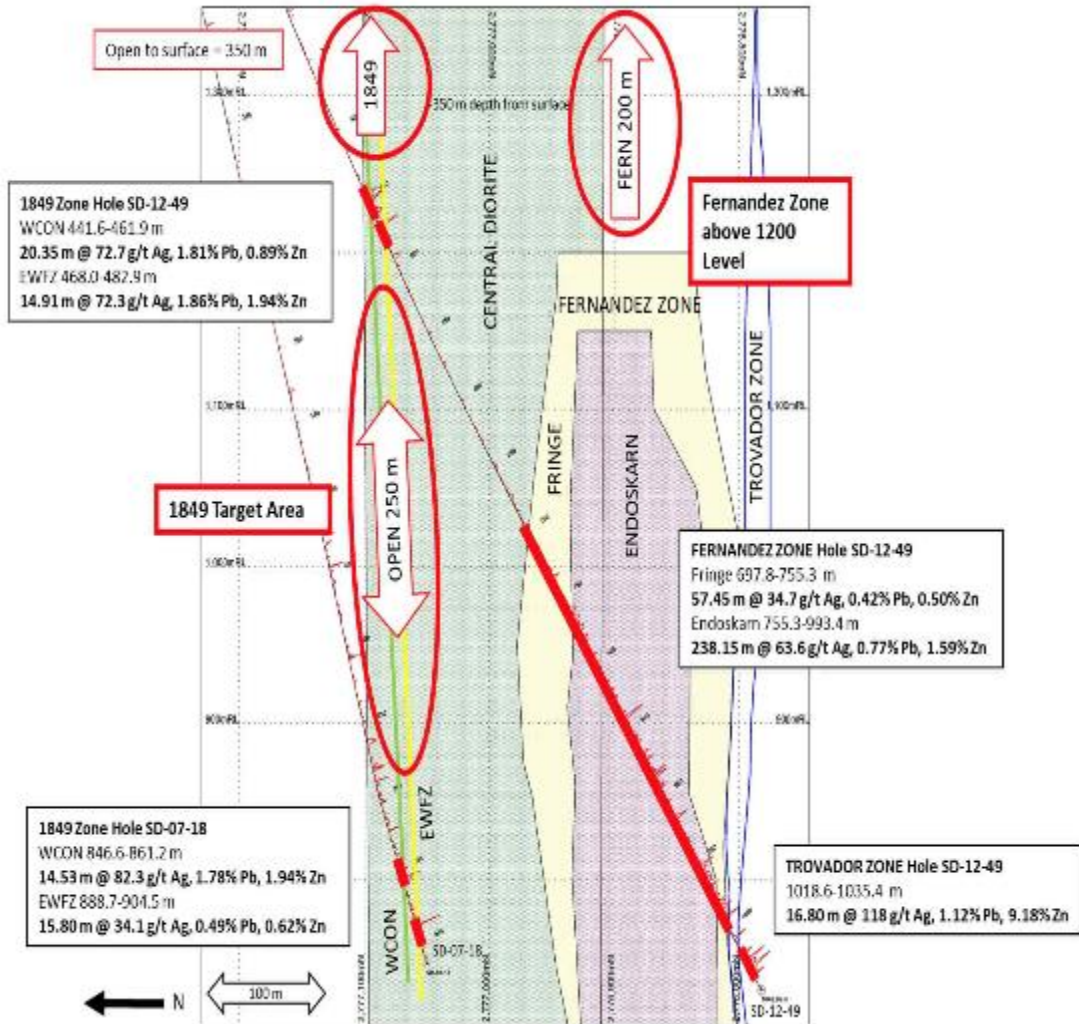

Geologic Model of the San Diego Project

Grade Enhancement to Western Side & Up-Dip Mineralization

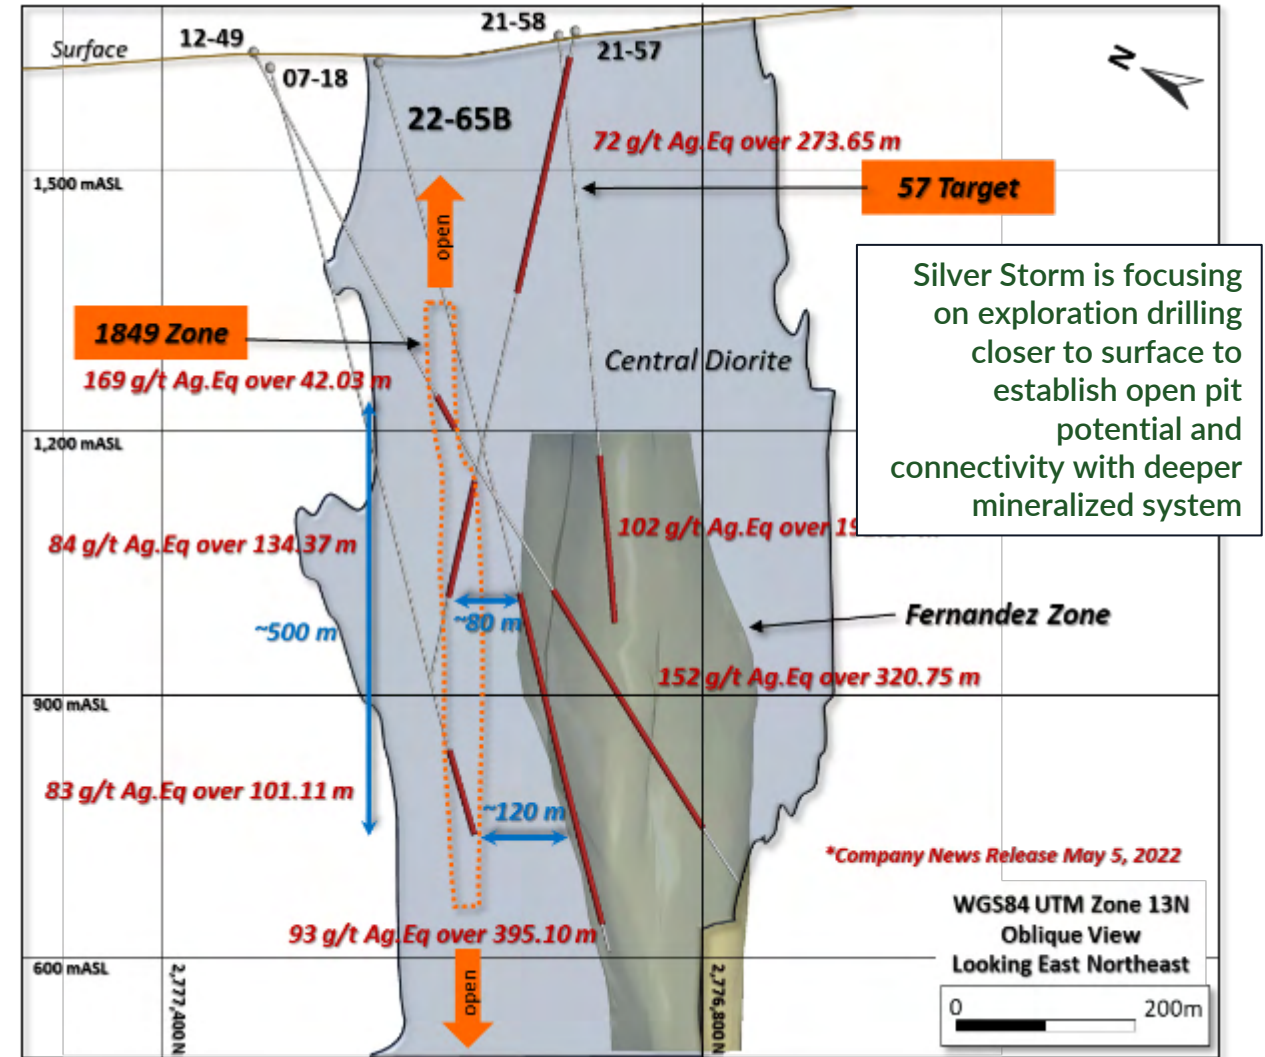

2020 Geologic Model¹

1. Drill hole intercepts from Table 15, page 68-69 & Appendix I in the April 12, 2013 SGS 43-101 report. Core lengths do not represent true widths. Zone outlines and traces from wireframes used in the 2013 SGS 43-101 Resource Estimate.

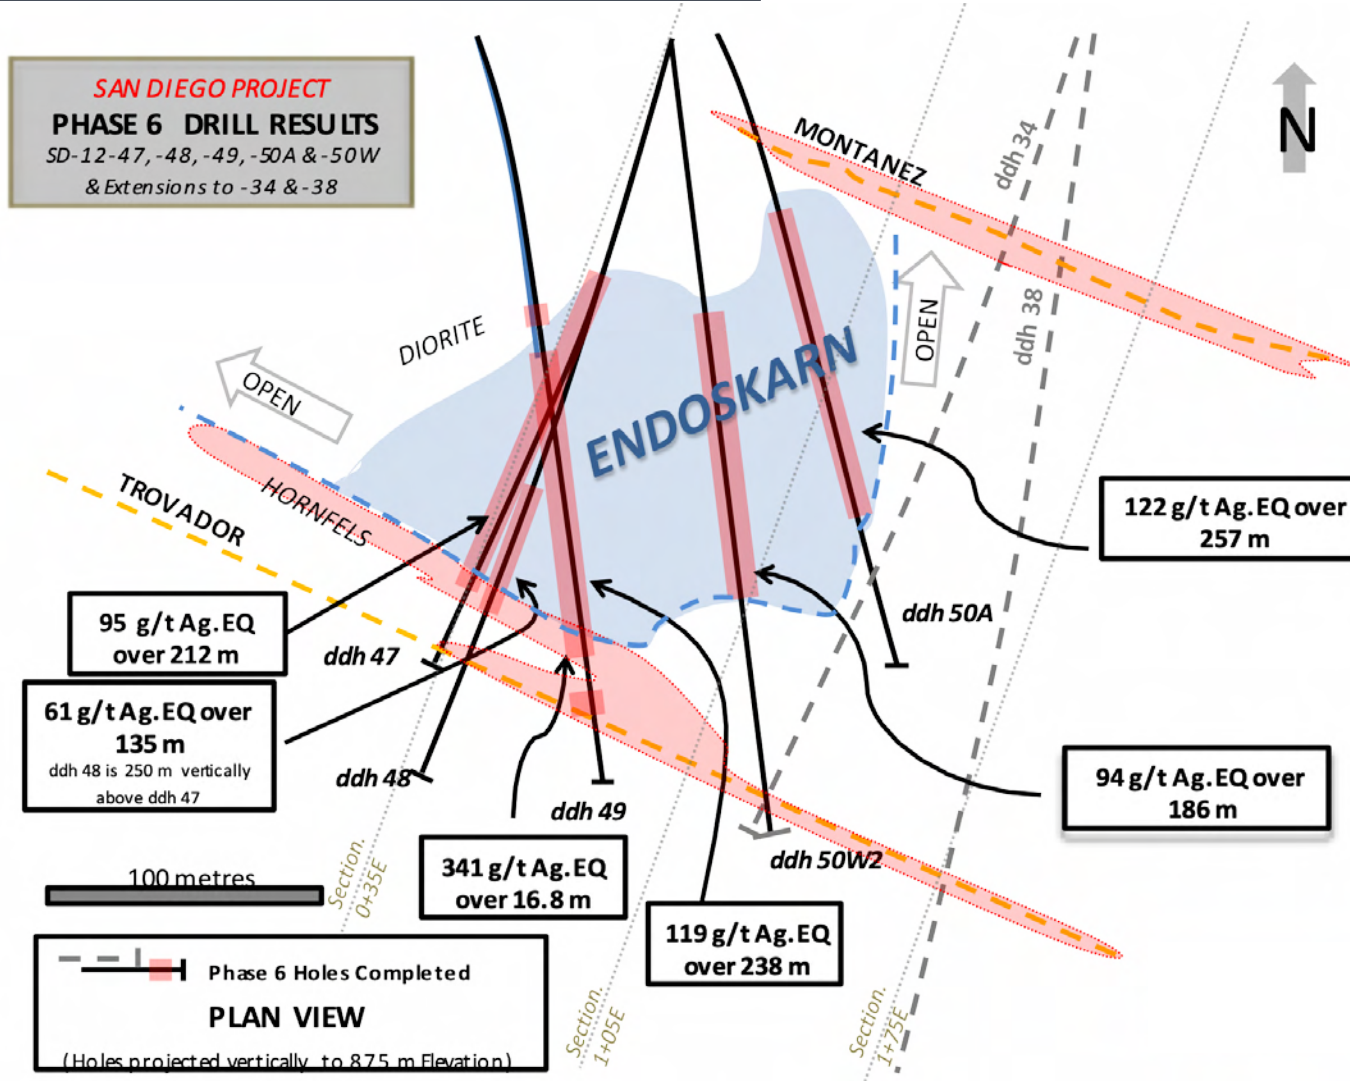

2022 Geologic Model²

2. Ag.Eq as disclosed in May 5, 2022 news release, using metal prices of: \$20.60/oz Ag, \$0.90/lb Pb, \$1.20/lb Zn, \$1650/oz Au, and \$3.25/lb Cu.

Initial Metallurgical Testing Complete Fernandez Zone

- Endoskarn mineralization amenable to conventional flotation techniques
- 76% Ag and 84% Pb recovered to a bulk concentrate grading 51% Pb, 4700 g/t Ag
- 84% Zn recovered to a concentrate grading 47% Zn

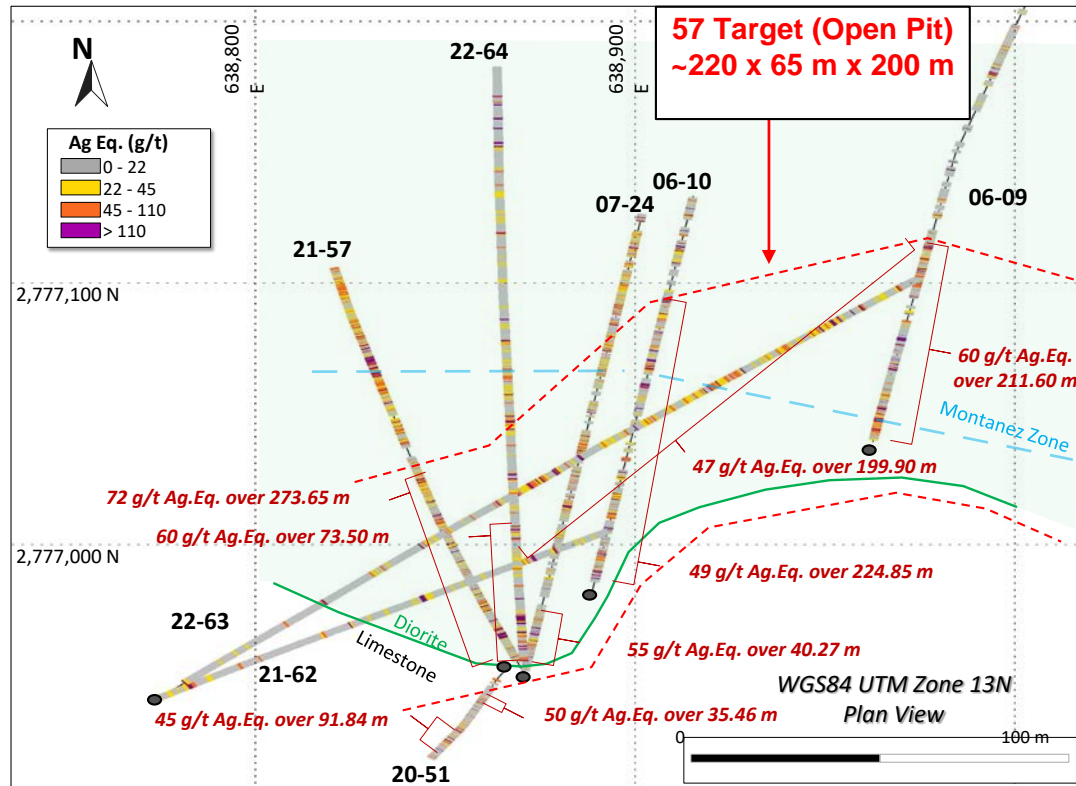

1. Ag Equivalent (Ag.EQ) calculation uses commodity prices of \$1,455/oz Au; \$28.10/oz Ag; \$0.96/lb Zn; \$1.00/lb Pb; \$3.65/lb Cu applying mill & smelter recoveries of 64.9% Ag, 76.4% Pb, 57.5% Zn, 0% Cu & Au as per Table 30, Page 103 April 12, 2013 SGS 43-101 report. Reproduction of Figure 23, page 66 & drill intercepts from Table 15, page 69 in the April 12, 2013 SGS 43-101 report.

San Diego 57 Target Discovery

Confirms Open Pit Potential Above Fernandez

- Hole 21-57 drilled **72 g/t Ag.Eq over 274 m** commencing from surface
- Historical database reviewed and several other holes were identified in proximity with similar results
- Dimensions of identified mineralization is 220 m x 65 m x 200 m @ ~ 60 g/t Ag.Eq¹
- Open along strike both East + West

Drill Results Plan View

Drill Results Cross-Section View - Surface to 290m

1. Silver equivalent: Ag.Eq g/t was calculated using 3-year trailing average commodity prices of \$20.60/oz Ag, \$0.90/lb Pb, \$1.20/lb Zn, \$1,650/oz Au, and \$3.25/lb Cu. The calculations assume 100% metallurgical recovery and are indicative of gross in-situ metal value.

San Diego Work Program

On-Site Work to Drive Value at San Diego

Current Program

- Soil sampling and ground geology
- Investigations of outcropping veins
- Identify targets for drilling

Subject to Additional Funding

- 5,000 – 10,000m drill program
- Infill drilling to follow based on results
- Updated resource estimate
- PEA followed by feasibility study
- Construction and production

Outcropping Vein System

Mineralization

Silver Storm A Compelling Opportunity

Considerable Re-Rating Potential

Silver Storm hosts a sizeable Global Resource base (273 Moz AgEq¹)...

...but is significantly undervalued compared to its peers → substantial multiple expansion opportunity

1. Reserves and Resources based on reported NI 43-101 statements and attributable ownership, with AgEq calculated using pricing of: \$22.50/oz Ag, \$1,800/oz Au, \$3.50/lb Cu, \$0.94/lb Pb, and \$1.35/lb Zn and incorporating reported metallurgical recovery rates and payable factors. M&I inclusive of mineral reserves where applicable.

- La Parrilla Technical Studies and Mine Planning in Q4 2024 to support future restart of mining and processing activities
- Restart Mine Q2/Q3 2025

SILVER STORM
— MINING —

Appendix

La Parrilla History

Production History Dating Back to 1956

A Pillar of the Community for Over 60 Years

- The first underground silver-gold-lead mines and processing facilities were constructed in 1956
- Several small mines were operated by Minera Los Rosarios (MLR) until 1999 when they were put on care & maintenance due to low silver prices
- In 2004, First Majestic acquired the MLR mining rights and plant, and expanded their holdings in 2006 by acquiring rights from Grupo México
- First Majestic re-commissioned the mill in 2004 and steadily expanded the mining rate and processing operations
- In 2012, a major expansion was completed which increased throughput to 1,000 tpd for both the leach circuit and the flotation circuit
- Between 2010 and 2019, the daily throughput averaged **1,460 tpd** producing **2.05 M oz Ag, 10.4 M lbs Pb and 6.6 M lbs Zn** annually with **average cash costs of \$8.60/oz Ag¹**
- The mine and processing complex was placed on care and maintenance in September 2019 due to low commodity prices (Ag, Zn & Pb)

Looking from the west end of the Los Rosarios vein towards the plant, c. 2006

View from the plant overlooking the town of San José de la Parrilla, c. 2016

¹ Per historic operating data provided to Silver Storm, as published in the Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico, prepared by SRK Consulting, dated August 10, 2023.

La Parrilla Historic Operations

34.3 Moz AgEq produced between 2006 and 2019 under FMS ownership¹

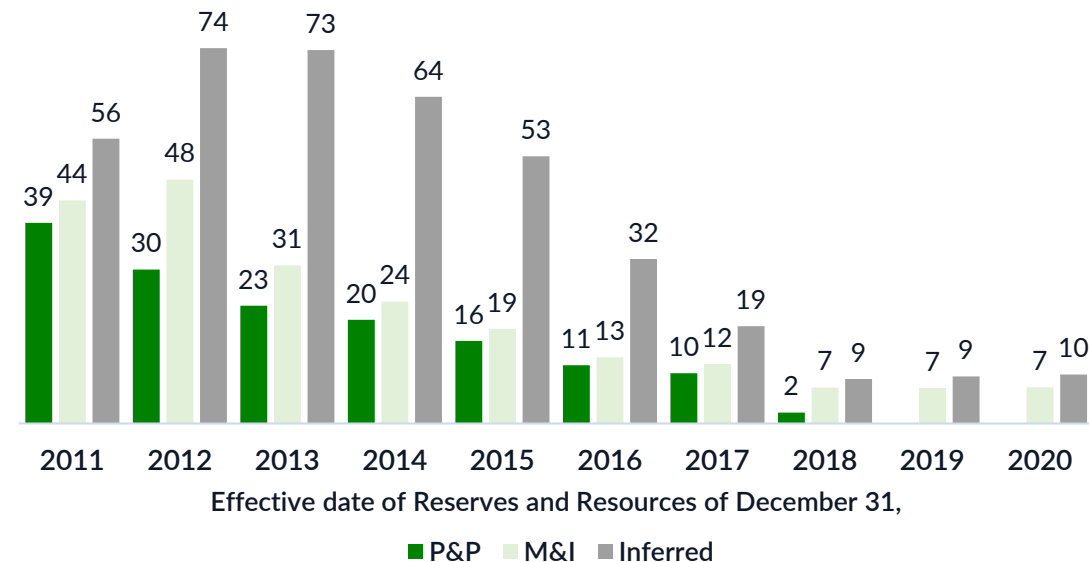

- ~ 642,000 tonnes processed annually at a grade of 147 g/t Ag (from 2012 - 2018)
- 2.37 Moz of average annual silver production; 3.52 Moz silver equivalent (~67% Ag + 33% Pb/Zn)
- Cash costs during this period averaged \$8.46/oz Ag (net of credits)
- Due low silver prices, milling and underground mining ceased in 3Q 2019 (Quebradillas open pit ceased in 2018)

Silver Equivalent Production (Moz)¹

Silver Reserves & Resources (Moz)²

1. Per historic operating data provided to Silver Storm, as published in the Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico, prepared by SRK Consulting, dated August 10, 2023.

2. As per AIF information filed on www.sedarplus.ca by First Majestic. Measured and indicated resources shown inclusive of mineral reserves. Note that the effective statements between December 31, 2011 to 2013, reserves were reported exclusive of resources. These have been shown inclusive above for consistency purposes.

La Parrilla Historic Operations

3.5M Ag.Eq. Oz produced at Avg. CC of \$8.46/Ag.Eq from 2012 - 2018 (NoC)

La Parrilla Historic Production and Costs¹

Production & Costs	Units	2012	2013	2014	2015	2016	2017	2018	Average

La Parrilla Regional Exploration

Large land package with very little historical work

- Current Mineral Resource footprint covers less than 790 ha (1%) of the land package
- Recent property surveys
 - Titan IP survey over main mine area (2012)
 - Aeromagnetic survey flown over central portion of property (2016)
 - ASTER satellite imagery alteration mapping covering entire property (2019)
 - Highlighted several unexplored areas containing interesting surface alteration patterns.
- Soil and chip sampling program (2019-2020) to the west and southwest of the mine
 - Defined several unexplored mineralized structures with values of interest at surface
- Multiple exploration targets require follow-up

La Parrilla Silver in Soil Samples (2019-2020) West and Southwest of Mining Area

La Parrilla Near-Mine Exploration Opportunities

Potential to Delineate New Zones Proximal to Current Mining Area

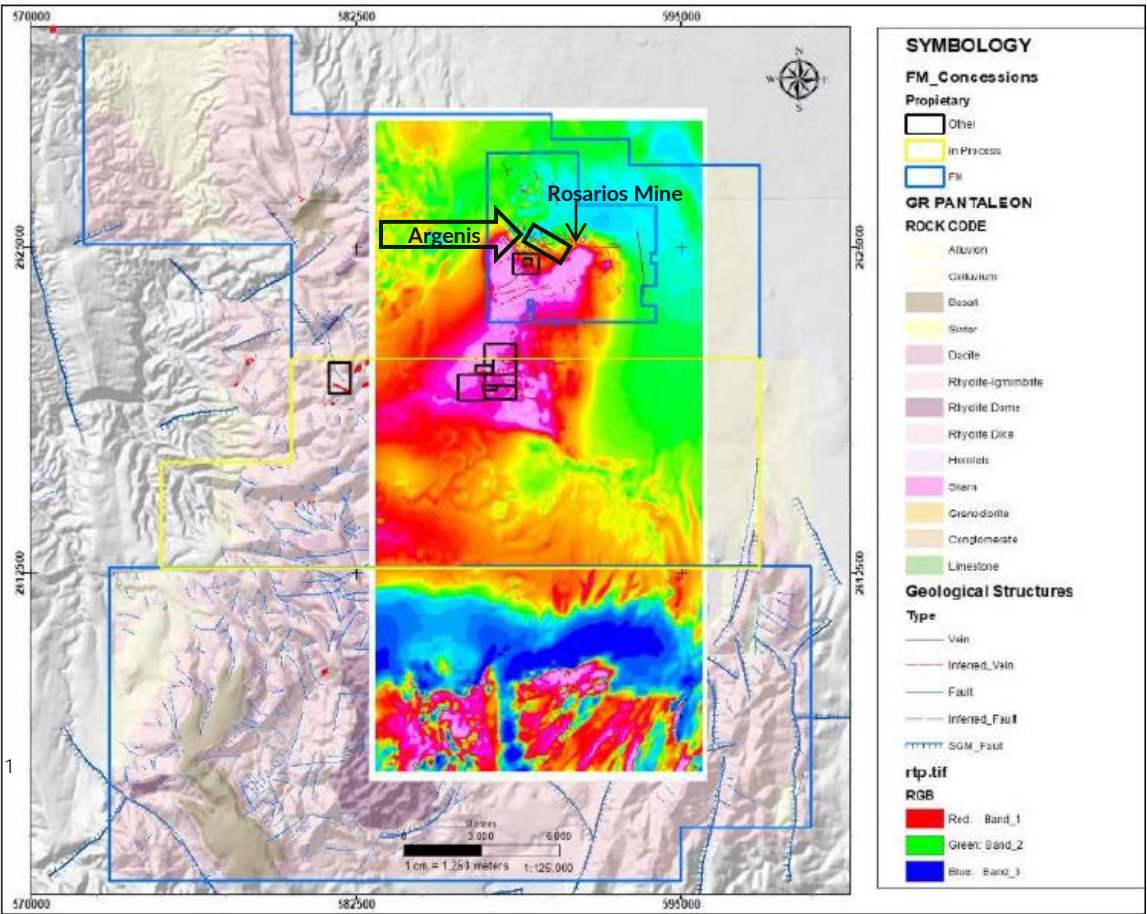

- La Ilusion area 750m to west of Rosarios operations
 - 2019-2020 soil sampling grid outlined Ag anomalies
 - 2020 drilling resulted in new discovery - Argenis Vein

Argenis Target and Initial Drill Results

HOLE ID	MAIN ORE BODY	FROM	TO	T W (m)	Au g/t	Ag g/t	Pb %	Zn %	Ag-Eq. g/t
SLP-LI-20-01	Argenis Vein	238.10	242.50	3.10	0.01	154	0.23	0.31	169
SLP-LI-20-02	Argenis Vein	167.55	171.15	2.80	0.03	256	1.74	2.25	366
SLP-LI-20-03	Argenis Vein	349.90	353.35	2.22	0.04	72	2.24	2.58	206

La Parrilla 2016 Aeromagnetic Survey

1. Silver-equivalent grade is calculated considering metal price assumptions of \$22.50/oz Ag, \$1,800/oz Au, \$0.94/lb Pb and \$1.35/lb Zn, metallurgical recoveries of 79.6% for Ag, 80.1% for Au, 74.7% for Pb and 58.8% for Zn and metal payable of 95% for Ag, Au, and Pb and 85% for Zn in concentrates produced from sulphides.

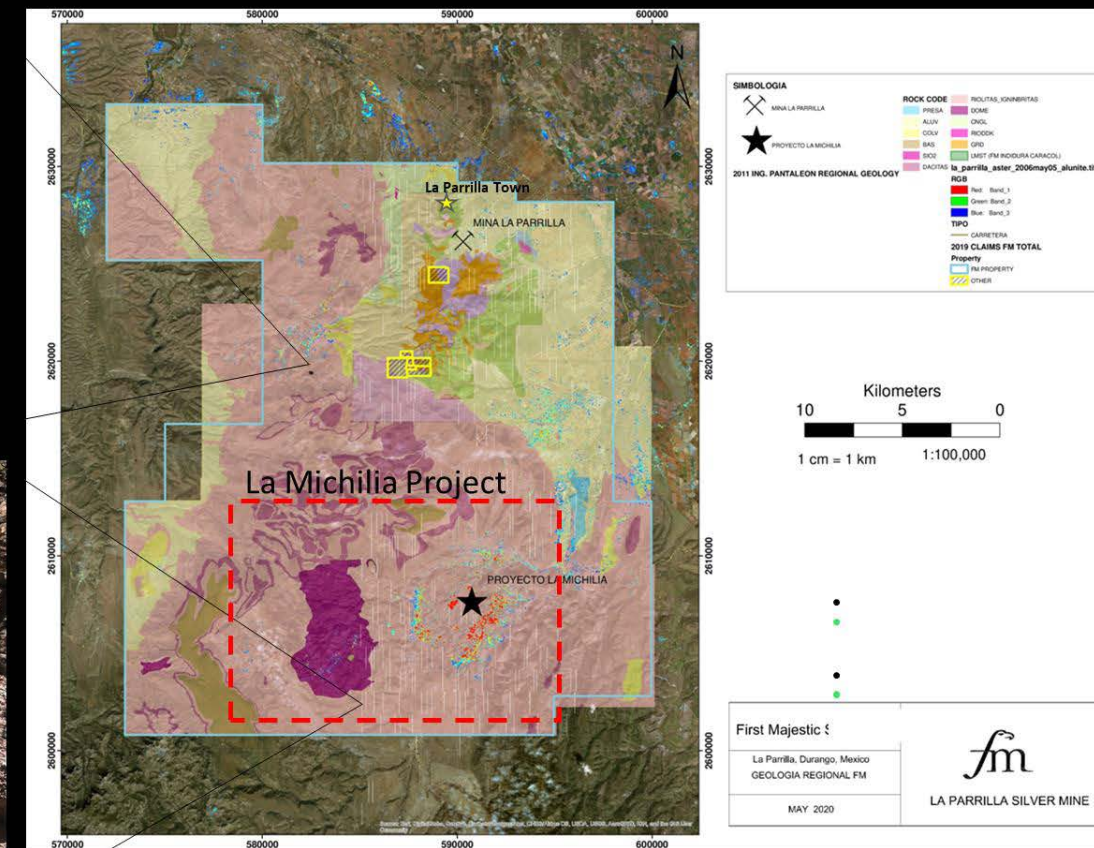

La Parrilla Regional Exploration – La Michilia

Preliminary Prospecting Uncovered Potential Epithermal System Structures

- The La Michilia permit area (31,350 ha) has never been drilled
- ASTER alteration map indicates large area with alunite on surface, which may be indicative of hydrothermal alteration

La Michilia Area

ASTER: 5 x 5 km area with alunite alteration on surface

La Parrilla Mineral Resource Estimate Notes

Notes for the Mineral Resource Estimate for La Parrilla as described in the 'Independent Technical Report for the La Parrilla Silver Mine, Durango State, Mexico', prepared by SRK Consulting, dated August 10, 2023 and available under the Company's profile on www.sedarplus.ca or the Silver Storm website www.silverstorm.ca.

1. Block model estimates audited by David F. Machuca-Mory, PhD, PEng, Principal Consultant (Geostatistics), and Ilkay Cevik, PGeo, Associate Consultant (Geology), SRK Consulting Canada Inc.
2. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
3. Mineral Resources have been classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards on Mineral Resources and Mineral Reserves.
4. All figures rounded to reflect the relative accuracy of the estimates.
5. Reasonable prospects of eventual economic extraction were considered by applying appropriate cut-off grades, removing unrecoverable portions of the estimates, and reporting within potentially mineable shapes.
6. Metal prices considered were US\$22.50 /oz Ag, US\$1,800 /oz Au, US\$0.94 /lb Pb and US\$1.35 /lb zinc.
7. Cut-off grade considered for oxide and sulphide block model estimates were, respectively US\$140 g/t Ag-Eq and US\$125g/t Ag-Eq. They are based on 2017 costs adjusted by the inflation rate and include sustaining costs.
8. Metallurgical recovery used for oxides based on weighted 2015-2017 actuals was 70.1% for silver and 82.8% for gold
9. Metallurgical recovery used for sulphides based on weighted 2015-2017 actuals was 79.6% for silver, 80.1% for gold, 74.7% for lead and 58.8% for zinc.
10. Metal payable used was 99.6% for silver and 95% for gold in doré produced from oxides.
11. Metal payable used was 95% for silver, gold and lead and 85% for zinc in concentrates produced from sulphides
12. Silver equivalent grade is estimated as: $\text{Ag-Eq} = \text{Ag Grade} + [(\text{Au Grade} \times \text{Au Recovery} \times \text{Au Payable} \times \text{Au Price} / 31.1035) + (\text{Pb Grade} \times \text{Pb Recovery} \times \text{Pb Payable} \times \text{Pb Price} \times 2204.62) + (\text{Zn Grade} \times \text{Zn Recovery} \times \text{Zn Payable} \times \text{Zn Price} \times 2204.62)] / (\text{Ag Recovery} \times \text{Ag Payable} \times \text{Ag Price} / 31.1035)$
13. Tonnage is expressed in thousands of tonnes, metal content is expressed in thousands of ounces or thousands of tonnes
14. Totals may not add up due to rounding

San Diego Mineral Resource Estimate Notes

Notes for the Mineral Resource Estimate for San Diego as described in the 'NI 43-101 Technical Report: Updated Mineral Resource Estimate San Diego Project, Velardeña Mining District, Durango State, Mexico', prepared by SGS Canada, with an effective date of April 12, 2013 and available under the Company's profile on www.sedarplus.ca or the Silver Storm website www.silverstorm.ca.

1. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
2. Mineral Resources have been classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") Definition Standards on Mineral Resources and Mineral Reserves.
3. All figures rounded to reflect the relative accuracy of the estimates.
4. CoG: Cut-Off Grade Ag.Eq (g/t); please refer to Table 31 on page 104 of the report for further information.
5. Ag.Eq: Silver Equivalent based on commodity prices of US\$1,495/oz Au, US\$28.10/oz Ag, US\$1.17/lb Pb, US\$0.85/lb Zn applying estimated mill recoveries & smelter deductions & payables of 64.9% Ag, 76.4% Pb & 57.5% Zn for sulphide and 60.5% Ag & 62.5% Au for oxide resources. Zn and Pb are excluded from Ag.Eq for oxide resources and Cu and Au are excluded from Ag.Eq for sulphide resources. Please refer to Table 30 & Pages 103-104 of the report for more information.
6. Pb and Zn are excluded from oxide vein resources due to lack of metallurgical tests illustrating their potential recoveries.
7. Totals may not add up precisely due to rounding.
8. (Mt): million tonnes; (M oz): million ounces.
9. Additional metallurgical testing required to establish potential.
