

BANXA

A PLUG & PLAY CRYPTO PAYMENTS SYSTEM

Banxa is a payments company with a mission to bring digital assets and payments to the public safely and securely.

How are we doing this?

We've built a fully-compliant, registered, payment and digital asset exchange infrastructure that handles both B2C and B2B clients.

Our global payment options for fast onboarding

GLOBAL

ASIA PACIFIC

EUROPE

Our Platform

Our platform integration is via **plug-and-play** API integration via a simple redirect widget – this gives our partners an opportunity to grow their user base and enable their users to deposit straight into their accounts – without needing to worry about fraud, fiat-to-crypto regulation, chargebacks and complicated payment integrations or credit card routing. It's fast, simple and secure.

Business to Business

By partnering with world's largest digital asset companies and providing a licensed fiat gateway that accepts a wide array of payments in multiple countries, we help our partners grow their core business whilst having a specialised solution to accept user deposits.

Our core promise is **no chargebacks** and we do this by having a best-in-breed KYC/AML solution and by our commitment to handle the entire value chain, allowing our partners to grow their business.

Business to Business

Our Partners

Business to Consumer

For retail clients, buying digital currencies can be difficult; but with Banxa's network of retail sites, it's never been easier.

OUR DOMAINS

 **bitcoin.com.au**

 **bitcoin.co.uk**

 **bitcoin.com.tr**

 **bitcoin.ca**

 **bitcoin.ie**

Business to Consumer

For retail clients, buying digital currencies can be difficult; but with Banxa's network of retail sites, it's never been easier.

OUR DOMAINS

- bitcoin.com.au
- bitcoin.co.uk
- bitcoin.com.tr
- bitcoin.ca
- bitcoin.ie

Business to Consumer

Step 1

User creates order via website

Step 2

User pays simply via phone or desktop

Step 3

User verifies ID

Step 4

Bitcoin is delivered to wallet address

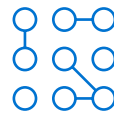

An Integrated Platform

Banxa's retail websites are integrated with our payments platform and provide not only the fiat gateway functionality, but all the information for a first time user to buy bitcoin or any of the other supported currencies via **how-to guides**, FAQs, blogs and social media posts.

Safety and Security

We take the security of our clients and partners seriously – we are registered in multiple jurisdictions and are actively working on licensing and registration in others. This allows us to serve our clients and partners better. We are focused on providing the best possible service for our customers.

Our compliance team uses state-of-the-art technology to ensure that each transaction is verified and complies with local regulation. We work with a number of security providers, including Chainalysis, who help us to ensure the safety of our clients. We're so confident that we give our B2B clients a **zero chargeback** guarantee.
