# FORWARD LOOKING STATEMENTS

## 前瞻性陈述

Forward-looking Information is generally identifiable by the use of the words:

**“believes”, “may”, “plans”, “will”, “can”  
“anticipates”, “intends”, “budgets”,  
“could”, “estimates”, “expects”,  
“forecasts”, “projects”**

and similar expressions, and the negatives of such expressions.

Forward-looking Information in this Presentation includes, but is not limited to, statements concerning economic trends, the size of the market, the timing and scope of Global Cannabis Applications capital expenditures, the anticipated use of proceeds, financial forecasts, and the proposed ownership allocation.

Global Cannabis Applications has based this Forward-looking Information on factors and assumptions about future events and financial trends that it believes may affect its financial condition, results of operations, business strategy and financial needs, including the ability of Global Cannabis Applications to generate cash flow from operations and obtain necessary financing on acceptable terms, general economic, financial market, regulatory and political conditions in which Global Cannabis Applications operates, consumer interest in Global Cannabis Applications products, competitions, anticipated costs, government regulation of Global Cannabis Applications activities and products and in areas of taxation and environmental protection, the timely receipt of any required regulatory approvals, and Global Cannabis Applications ability to obtain qualified staff, equipment and services in a timely and cost efficient manner.

This Presentation (together with any supplements and any other information that may be furnished to prospective investors by **Global Cannabis Applications Corp.** (“**Global Cannabis**” or “**Global Cannabis Applications**”) contains “forward-looking statements” or “forward-looking information” within the meaning of applicable securities laws (collectively “Forward-looking Information”).

While Global Cannabis Applications considers these assumptions to be reasonable, these assumptions are inherently subject to significant uncertainties and contingencies. Additionally, there are known and unknown risk factors which could cause Global Cannabis Applications actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information contained herein. Known risk factors include, among others, regulatory risks, the lack of a public market for the securities of Global Cannabis Applications, the limited operating history and financial track record of Global Cannabis Applications and the uncertainty as to revenues, reliance on key personnel, product liability, unfavorable publicity, management of growth and the difficulty in forecasting. Additionally, letters of intent for acquisitions that Global Cannabis has entered into may not be consummated or consummated on the terms disclosed by Global Cannabis. In the event that the letters of intent are not completed, or definitive agreements are not entered into Global Cannabis may not achieve the results that it is forecasting or the operating results that management believes are attainable in the event that the letters of intent are consummated.

### GCAC Files Patent Application for Cannabis on the Blockchain

December 19, 2019 /

Vancouver, British Columbia, Canada, December 19, 2019 – Global Cannabis Applications Corp. ("GCAC" or the "Company") (CSE: APP, FSE: 2FA, OTCQB: FUAPP), a leading developer of innovative data and AI technologies for the medical cannabis industry, announced that it has filed a provisional method and composition patent application (Serial No. 62/950,158) with the U.S. Patent and Trademark Office [...]

## SEED2SEED™

GCAC's patent is defined "as the process for determining the averaged efficacy of a consumed gram of medical cannabis (or CBD) for the treatment of a specific ailment through the use of an Artificial Intelligence algorithm, which is then stored on an immutable blockchain with the specific growing data of that gram"

GCAC的专利被定义为“通过使用人工智能算法，确定消耗一克医用大麻（或CBD）治疗特定疾病的平均疗效，然后将该克大麻的具体种植数据存储在不可改变的区块链上的过程”。
